Level 1

Fleet Emission Analysis

A simple way to calculate your fleet's carbon footprint

Has your company introduced specific emission reporting and reduction targets? The Alphabet Carbon Manager is here to help, using smart software to accurately measure and analyse your fleet's emissions. This service includes:

- An introductory workshop (1h)
- Pre-upload of relevant Alphabet fleet data into the Alphabet Carbon Manager
- The option to add external fleet data too
- Individual analysis of your fleet emissions
- A full year of access to our CO₂ reporting tool.

Fleet Emission Workshop

Expert advice on reducing your fleet's emissions

Once you know your fleet's emissions, it's time to take measures to reduce them. To create an efficient and cost-effective strategy that works for your company, it's essential to consider a wide range of interests – from corporate goals to employee needs. That's why we offer a bespoke workshop with our expert consultants.

What you can expect:

- In-depth workshop focused on your fleet's unique challenges and opportunities
- Collaborative plan of action to meet your sustainability goals.

Level 2

Individual Fleet Emission Consulting

Tailor-made support for your fleet's specific requirements

Our experts will work alongside you to create the ideal solution – covering everything from reviewing long-term strategy to adapting your car policy.

Along with all the features of Level 1, consulting includes:

- Identification of CO₂ hotspots in your fleet
- Evaluation of suitable CO₂ limits for your vehicle fleet
- Guidance in communicating the new sustainability strategy to employees
- Generating a bespoke sustainability strategy for your fleet
- Assessment of the most suitable vehicles for your fleet
- Support for you to implement the reduction measure

Calculating the emissions of your entire business with Plan A

Looking to take your carbon accounting beyond just fleet emissions and cover all areas of your business? Plan A is here to support you on your journey to sustainability with a comprehensive suite of services, including:

- Calculation of corporate emissions (Scope 1, 2 and 3)
- Calculation of supply chain emissions
- Development of decarbonisation strategies
- Development of science-backed sustainability objectives
- ESG reporting

These elements are crucial for building a robust net zero strategy.

With Plan A, you won't just get a plan – you'll get hands-on support, a user-friendly sustainability platform and a range of in-app training resources to help you achieve your CO₂ reduction goals.
